

Training and Facilitator Development Programme

Training Development Programme

We have been offering training solutions for emerging and social entrepreneurs over the last 10 years and the Cause training method has been implemented in a range of organisations and training providers in the sector.

The programme is ideal for practitioners and professional facilitators that offer enterprise development training or wish to compliment their current curriculum with business training.

The programme offers consulting, facilitator development, provision of learning material and resources.

TRANSFORMATIVE LEARNING FOR EMERGING AND SOCIAL ENTREPRENEURS

Our training methodology is based on transformative learning and our continued research in the field offers participating organisations ongoing and updated information.

Our ultimate aim is to equip facilitators with the skills to promote entrepreneurialism and contribute to economic development.

Assessment

The programme commences with an assessment of organisation growth objectives and current resources.

Schedule

A schedule is set for the development of the various issues outlined in the assessment.

Reporting

Progress reports are provided periodically to measure and assess progress.

Training and Facilitator Development Programme

Assessment of current training services

The programme starts with the assessment of current training services including material and facilitators. In addition, targeted learners are profiled and outcomes objectives are set.

Planning and development of training services

Based on the assessment a training plan is compiled, outlining the training service provision objectives of the organisation.

Provision of Cause training material

Cause training material is provided and integrated into current material through a range of workshops. Where needed additional material is created to fulfil the organisational training objectives.

Facilitator training and development

Facilitators are capacitated through a range of material-integration workshops, to fast-track their subject knowledge and facilitation skills.

Mentoring and co-facilitation services for practitioners

Individual mentoring and co-facilitation services are offered to assess and remedy facilitation quality and ability.

Training marketing consulting

Our services include marketing support in promoting training services and attracting relevant participants.

Participant selection and screening

We provide tools and support in the development of efficient application and assessment processes, to insure accurate participant selection.

Training support services

Ongoing training support is provided and includes research, new material development, service promotion and identification of opportunities.
